PHYSICS AND FORCES

Physics is the study of Energy and Forces.

Energy is the ability to do work.

A force is a _____, _____ or _____ on an object.

Examples	Picture	Pushing pulling or twisting force?
1		
2		
3		
4		
5		
6		

Forces can change the motion (movement) of an object.

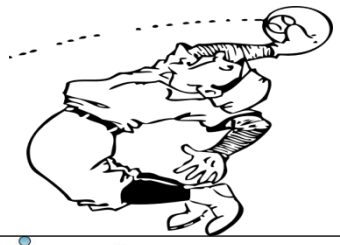

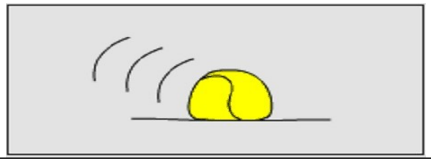

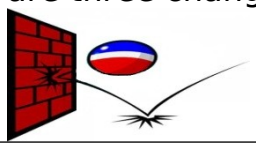

Forces can make objects move faster= A_____.

Forces can make objects slow down or stop = D_____.

Forces can make an object change the d_____ it is moving in.

Forces can make an object change shape.

Example	Picture	Are forces causing acceleration, deceleration, a change in direction or a change

		in shape?
1	Man catches ball. 	
2		
3	 knead	
4	Car speeds up. 	
5	A tennis ball hits the ground and is squashed. There are two changes here. 	
6	Ball hits wall and bounces off. There are three changes here. 	

Force is measured in the units called N_____ . The symbol N is used normally.
