Revision for Topic Test Year 7 Physical Science

1.

a) The amount of matter in an object _____

b) The pulling force of gravity on a body _____

c) Allows electrons to flow through _____

d) When two forces are equal and opposite _____

e) Does not allow electrons to flow through _____

f) The unit used to measure forces _____

g) The ends of a magnet _____

h) A contact force present when two objects are in contact _____

i) When two poles pull each other _____

j) The tendency of an object in motion to continue moving _____

k) A force of attraction between two objects _____

l) When two forces are not equal and opposite _____

m) When two poles push each other away _____

n) A spectacular light show near the poles _____

o) A push, pull or twist _____

p) The point around which a lever pivots _____

q) When something slows down _____

r) The point in an object where all the weight appears to balance _____

s) Used to make a task easier _____

t) A long rigid rod that pivots about a point _____

u) A wheelbarrow is an example of this _____

v) Scissors are an example of this _____

2. Draw and label an atom. p.277

3. Draw and label a magnetic field. p.275

4. Draw and label a diagram showing how poles attract and repel. p.276

5. Draw, label and give an example of a, 1st class, 2nd class and 3rd class lever. p.293

6. **List** 4 ways to reduce friction p.258_____

7. Complete the following:

Force to Left (N)	Force to Right (N)	Forces Upwards (N)	Forces Downwards (N)	Direction of Movement
10	10	10	0	
20	30	0	0	
25	5	15	15	
30	30	10	50	
40	40	100	100	

8. **Explain** inertia p.247_____

_____

_____

_____

_____

9. **Name** the units used to measure force p.246_____

10. **Describe** what a force can do to something p.246_____

_____

_____

_____

11. Select the correct term in the following sentences:

    a) Gravity is a **contact/non contact** force.

    b) Gravity **pulls/pushes** objects towards the Earth.

    c) All objects naturally **attract/repel** each other.

    d) Objects fall at different speeds due to their **weight/surface area.**

12. **Explain** how an object becomes charged up p.277 _____

_____

_____

13. Give three examples of things we could not do without friction p.257 _____

_____

14. Give three examples of things we do where friction is annoying p.257 _____

15. **State** what a simple machine can do. p.289 _____

16. Use a labelled diagram to **explain** how mass and weight are different. p.264

17. **Name** three non-contact forces. p.263, p.273, p.278 _____

18. **Explain** the difference between a temporary magnet and a permanent magnet. p.276 _____
