Compare and Contrast

SOLIDS, LIQUIDS AND GASES

QUESTION	SOLID	LIQUID	GAS
What are they made up of?			
How close are the particles?			
How much can the particles move?			
What is their shape like?			
What is their volume like?			
Is it able to be poured?			
Is it compressible?			

From the table above **make some statements** about solids, liquids and gases.

Eg. Solids cannot be compressed. Liquids cannot be compressed.

Now **compare** the two using a comparison linking word.

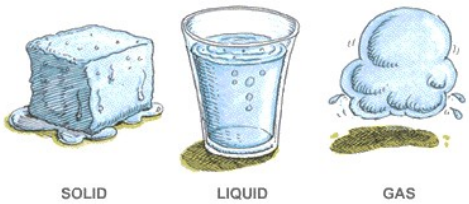

Comparing Words

both	same	in both	like
in both cases	similarly	and	as well as
in the same way	just as…so…	alike	similar in that

In both cases solids and gases are unable to be compressed.

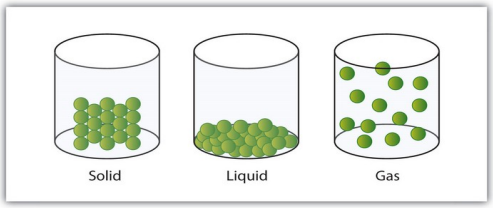

Both solids and gases are unable to be compressed.

Solids and gases are the **same** in that they cannot be compressed.

Contrasting Words

On the other hand	in contrast to	different from	like
alternatively	but	although	rather than
whereas	while	unlike	yet
even though	less than	more than	whilst
