Here are some words you may find useful:	
Friction	Magnetism
Electricity	Gravity
Push	Pull
Twist	Change
Tear	Lubrication
Smooth	Direction

Year 8 Science

Name _____

FORCES

1. What can forces do?

2. Give examples of 3 different forces and explain how they act.

3. What are contact forces? Give an example.

4. What are non-contact forces?

5. Name the three types of non-contact forces.

6. What is friction?

7. How can friction be reduced?

8. How can friction be useful? Give some examples.

9. Unscramble the words using the clues to help you.

(a) This force keeps us on the earth.

T	A	I	G	V	Y	R

(b) This force slows down moving objects.

I	R	N	F	O	C	T	I

(c) This is a type of contact force.

W	S	N	I	T	G	T	I

(d) This causes

E	R	F	C	O

changes.

(e) This kind of force must touch an object before it can make something happen.

N	O	T	C	T	C	A

(f) These provide the force needed to move the body.

C	E	M	U	L	S	S

(g) This is a type of non-contact force.

R	E	Y	C	E	C	T	L	I	T	I
