

Apostrophe of Possession
Atoms

Apostrophe of possession is used to show that the object belongs to someone or something. For example: Tom's bicycle. The bicycle belongs to Tom. Or, the house's roof needed repairing. The roof belongs to the house.

Choose the correct alternative:

1. There **are/is** only 118 known **types/type's** of **atoms/atom's.**

2. Every **atoms/atom's** characteristics **are/is** unique.

3. **Atoms/atom's are/is** made up of even smaller particles known as subatomic **particles/particle's.**

4. **Protons/proton's** and **neutrons/neutron's are/is** in the nucleus.

5. The **protons/proton's** charge **are/is positive/negative**.

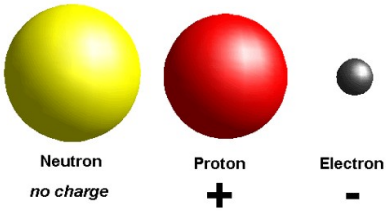

6. The **electrons/electron's are/is** in the electron cloud**.**

7. The **electrons/electron's** charge **are/is positive/negative.**

8. **Neutrons/neutron's** have a neutral, or no charge.

9. The number of **protons/proton's** in an atom **are/is** called the atomic number**.**

10. The number of **protons/proton's** and **neutrons/neutron's** in an atom **are/is** the mass number.

Questions:

1. How many known types of atoms are there? _____
2. Is every atom the same? _____
3. What are subatomic atoms? _____
4. Which subatomic particles are in the nucleus? _____
5. What charge does a proton have? _____
6. Where do you find electrons? _____
7. What charge do electrons have? _____
8. What charge do neutrons have? _____
9. How do you work out atomic number? _____
10. How do you work out mass number? _____
