Lab Safety 1

You will usually find a set of ‘Lab Rules’ in a science lab. They are there for your safety!

The drawing below shows a lab where there are no safety rules.

1 Write down a list of all the things going wrong in this lab.

2 For each of your answers, write a safety rule.

3 Design a poster for your lab, showing one safety rule and the reason for having it.

[Developing skills in: planning]
