Gravity 7.3 Revision Test

Name_____

1. Gravity is the attraction between two objects, what happens to this attraction when the mass changes?

   _____
   _____

2. If an object lies within earth's gravitational field what will it experience?

   _____

3. Is gravity a contact or non-contact force?

   _____

4. Describe what the mass of an object is.

   _____
   _____

5. What are the two factors that affect the weight of an object?

   _____
   _____

6. Do items of different masses fall at different rates? Please explain

   _____
   _____

7. Do items of different shape fall at different rates? Please explain

   _____
   _____

8. When air resistance equals an objects weight force and the object now falls at a constant speed, this is known as?

   _____

9. What are the four forces acting on a plane?

   _____
   _____

10. Challenge: Describe how a plane achieves lift.

    _____
    _____
    _____
    _____
