Igneous Rocks

Name:

Using Pearson Science 8 Chapter 8.1

What is the difference between lave and magma?

How are Igneous Rocks formed?

What are crystals? How are they formed

There are two types of Igneous Rocks, Intrusive and Extrusive. You will need to use pages 279 and282-283 to fill in the following table:

	Intrusive	**Extrusive**
How is it formed		
Give 2 examples		
Describe its characteristics		
Explain why it has these characteristics		

Give three characteristics of Igneous Rocks:

- .
-
-

Example of Igneous Rock	Use	Characteristics that make it suitable for this purpose.

Three Interesting things I have learned about Igneous Rocks:

- .
-
-
