➢For example, if the ocular magnification is 10x and the objective magnification is 40x the total magnification would be _____.

How to draw what you see under a microscope

➢ Must use a sharp lead pencil (no colour!).

➢ Draw in 2D not in 3D (flat drawing).

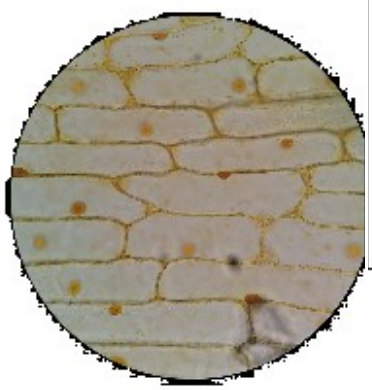

➢ Only draw what you can see.

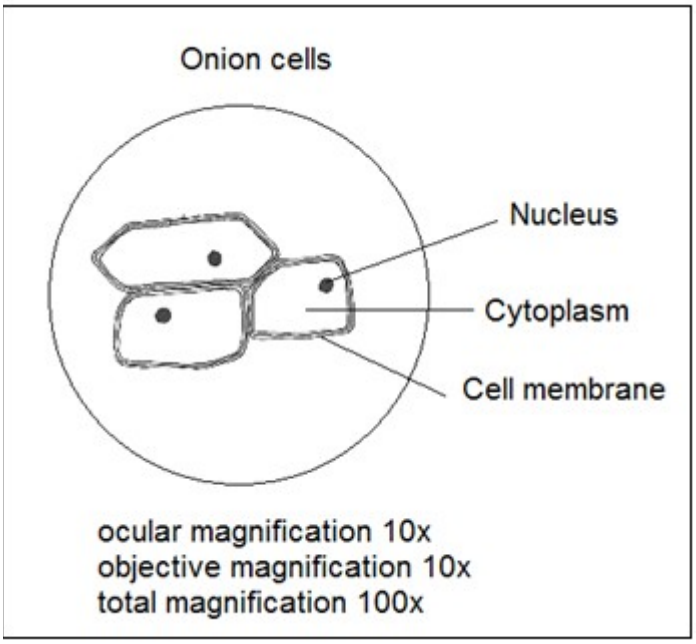

➢ Do not shade in. Draw the main outlines and structures.

➢ Include a title of what it is you are looking at.

➢ Include the ocular magnification, objective magnification and total magnification.

➢ Neatly label the main structures using structures.

a ruler to draw a line to the
