Year 7 Science Name: _____

Introduction to Forces Form: _____ Date Due: _____

1. A force is being applied to an object. What 5 things might happen to it?

_____

_____

_____

2. The scientific term for Slowing down: _____ and

Speeding up _____ .

3. Give 2 examples of situations (other than those mentioned above) where an object:

Situation	Example 1	Example 2
Stops		
Speeds up		
Changes direction		
Changes shape		
Slowing down		
Starts movement		

4. In physics, **elasticity** is the tendency of solid materials to return to their original shape after being deformed. Solid objects will deform when forces are applied on them. If the material is elastic, the object will return to its initial shape and size when these forces are removed.
State which are elastic and which are inelastic or being both, Expalin.

SQUASH BALL ( ), TABLE TENNIS ( )
TEST TUBE ( ) POLYSTYRENE SHEET ( )
SPRING ( ) WOODEN RULER ( )

_____

5. A force can be _____ or a _____ or a _____. Examples:

Force type	Example 1	Example 2
P __ __ __		
P __ __ __		
T __ __ __ __		

6. Look around your room / house, identify 4 forces that act through contact only.

_____

_____

_____

_____

7. Which of the following are contact and non-contact forces?

Friction _____ Magnetic force _____

Gravity _____ Air resistance _____

Buoyancy _____ Electrostatic force _____

Hitting a ball _____ Swimming _____

8. Use a dictionary / internet to find out the meaning of the following terms with example.

Buoyancy: _____

_____

_____

Electrostatics: _____

_____

_____

9. How to draw forces? What do you do to indicate a larger or small force?

_____

_____

10. What unit is used to measure forces? What is its symbol?

_____

11. Who was this unit named after: Give 4 details about him?

_____

_____
