NERVOUS

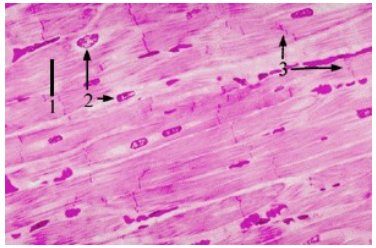

EPITHELIAL

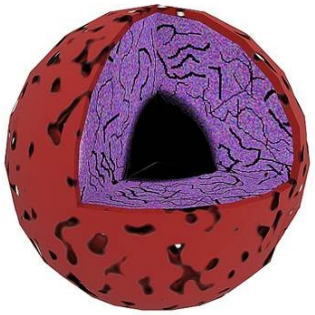

CELL MEMBRANE

MUSCLE

NUCLEUS

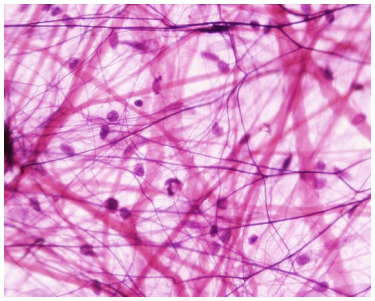

What is the function of the cell nucleus?

CYTOPLASM

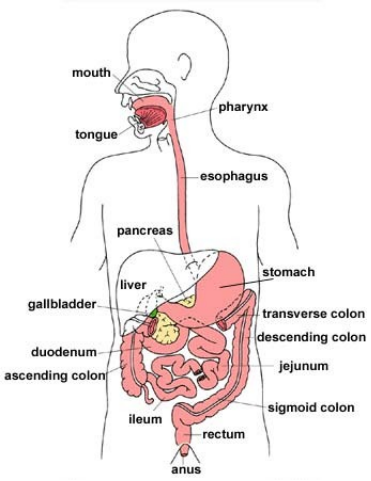

CONNECTIVE

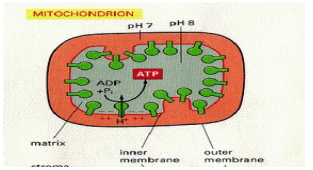

RIBOSOMES

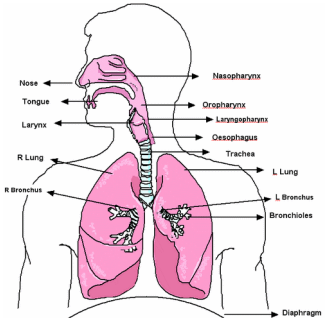

DIGESTIVE

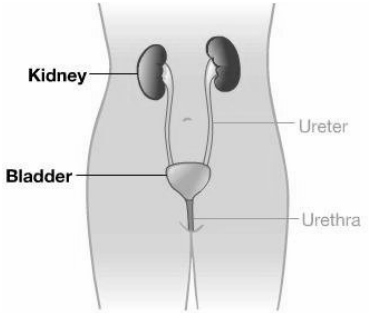

MITOCHONDRIA

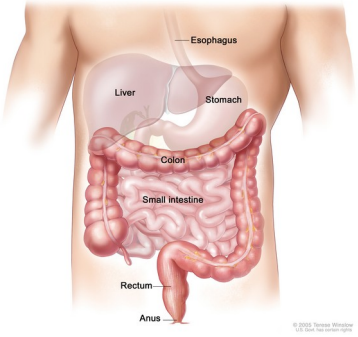

RESPIRATORY

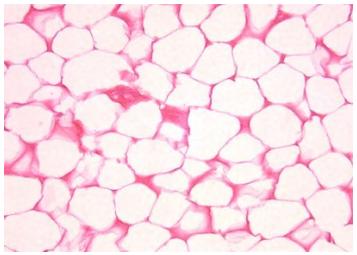

EXCRETORY

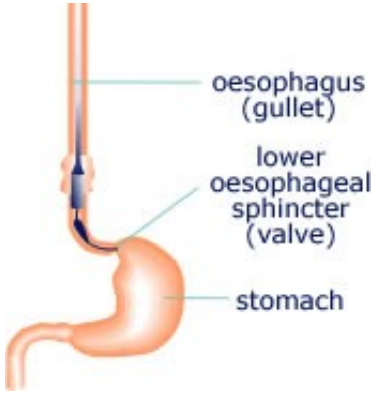

LARGE INTESTINE

ADIPOSE CELLS

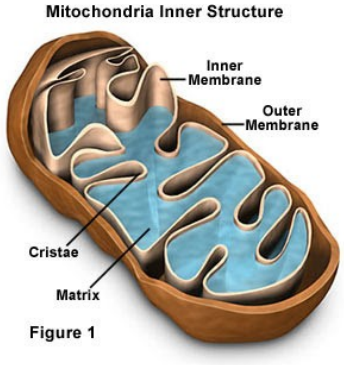

OESOPHAGUS

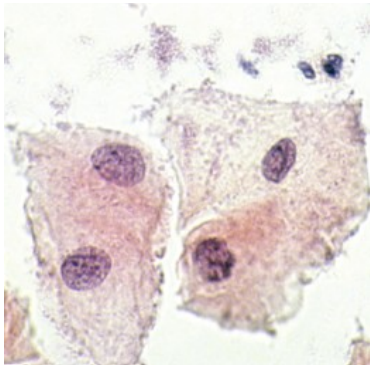

LUNGS

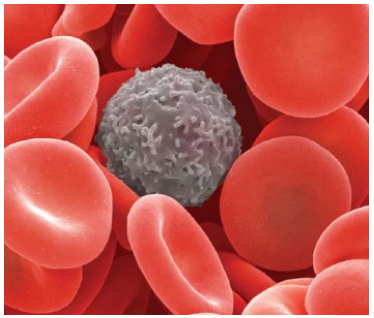

MITOCHONDRIA

EPITHELIAL CELLS

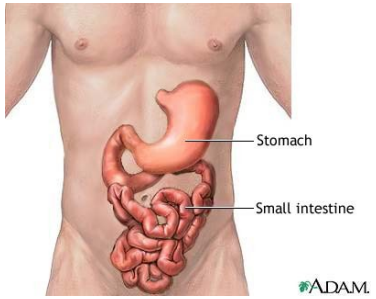

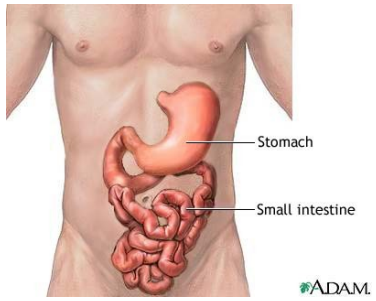

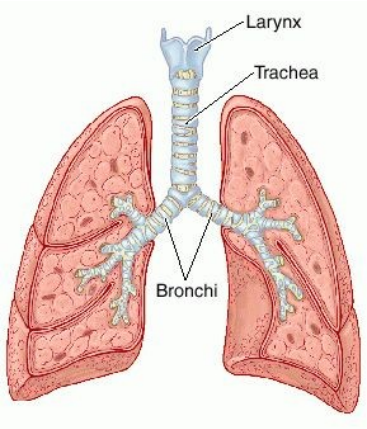

RED BLOOD CELLS

Name some specialised human cells

SMALL INTESTINE

KIDNEYS  	**TRACHEA**  			

		ANSWER: Protists	**ANSWER:** Chlamydomonas Paramecium Amoeba Euglena	**ANSWER:** Photosynthesis is the process that plants undergo to turn sunlight into energy
