Specialised Animal Cells

Animals are _____ complex than plants and they have a greater variety of different cell types. The human body contains about 50 trillion cells and more than 200 different types of cells. A few of these 200 types are in the table below.

Complete the following table:

Muscle cells	Nerve cells	Blood cells	Fat cells
The three types are:	Found in your…	Two types are:	Number of types:
Two muscles you can move are:	Carry…	Red blood cells …	Brown fat cells…
Two muscles you cannot move are:	Have long fibres called…	White blood cells…	White fat cells…
Muscles contain a large number of…	Longest axons are…	There are many more _____ blood cells than _____ blood cells in your blood.	Fat cells also…..
Heart muscle is called…		Diagram:	White fat cells are found…
