W.S.62. **Neutralisation.** Name .....

Sometimes we need to NEUTRALISE (cancel out) acids or alkalis. Acids and alkalis can be used to neutralise each other. The diagrams below show some examples of this.

Acid indigestion

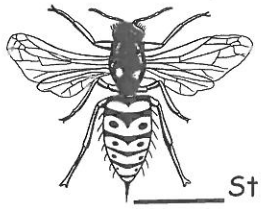

Stomach contains hydrochloric acid. Too much acid causes indigestion.

Indigestion tablets contain a weak alkali to neutralise the acid.

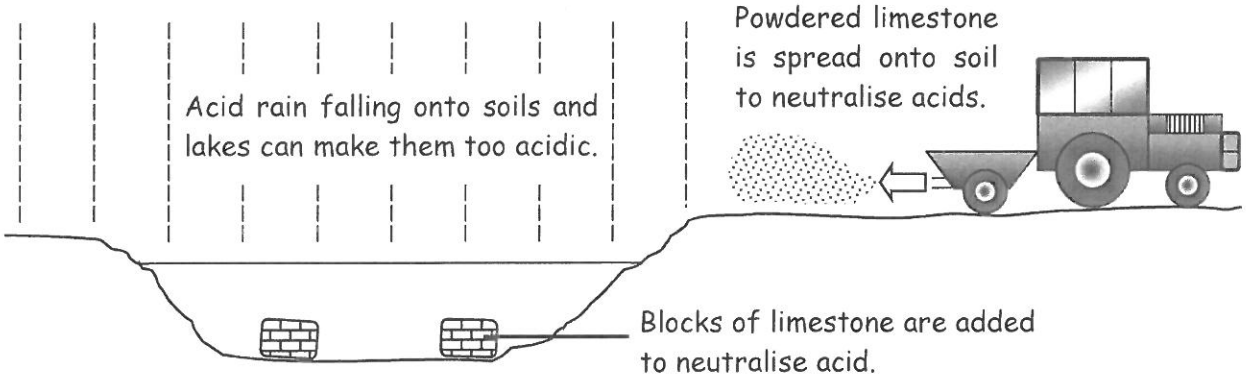

Insect stings

Sting injects poison.

WASP STING - alkaline so treat it with a weak acid such as vinegar.
BEE STING - acidic so treat it with a weak alkali such as sodium bicarbonate.

Acid soils and lakes

Exercise - Fill in the missing words in the passage below.

The stomach contains ..... acid. If there is too much acid in the stomach it causes ..... Tablets can be taken that contain a weak ..... to neutralise the acid. A bee sting is ..... and must be treated with a weak alkali such as sodium ..... A wasp sting is alkaline and must be treated with a weak acid such as ..... Soils and lakes can become too acidic in areas that are polluted with acid ..... Blocks of ..... can be added to lakes to neutralise the acid and ..... limestone can be spread onto fields.

powdered vinegar hydrochloric acidic limestone rain alkali bicarbonate indigestion
