W.S.41. The periodic table.

Name .....

All of the elements have been arranged into the PERIODIC TABLE. This contains seven rows of elements called PERIODS. These are arranged so that each column contains elements with similar properties. The table shows the symbol and ATOMIC NUMBER (number of protons) for every element.

Exercise - Complete the missing words in the passage below.

Each group in the periodic table contains elements that have similar ..... The atomic number gives the number of ..... that an element contains. The lightest element is ..... (H) which has an atomic number of one. The atomic number of ..... is eight. Sodium (Na) and potassium (K) are two very ..... metals. Iron (Fe) and nickel (Ni) are two of the ..... metals. The most reactive non-metals are called the ..... The ..... gases are very unreactive. Magnesium (Mg) and calcium (Ca) are both in group ..... of the periodic table. Nitrogen (N) and phosphorus (P) are both in group ..... of the periodic table.

magnetic **noble** **two** **hydrogen** **reactive** **five** **halogens** **properties** **oxygen** **protons**
