Name: _____

Date: _____

Chemistry: *Ionic Compounds:*

Write the name of each of the following compounds.

1. $CuCl$	1. _____
2. FeO	2. _____
3. PbO_2	3. _____
4. $Sn(SO_4)_2$	4. _____
5. Au_3N	5. _____
6. Fe_2S_3	6. _____
7. $Cu_3(PO_4)_2$	7. _____
8. $Sn(CO_3)_2$	8. _____
9. AuF	9. _____
10. PbO_2	10. _____

Write the chemical formula for each, given the names.

11. tin (II) carbonate	11. _____
12. copper (I) oxide	12. _____
13. lead (III) carbonate	13. _____
14. gold phosphate	14. _____
15. iron (II) hydroxide	15. _____
16. copper (II) nitride	16. _____
17. gold iodide	17. _____
18. lead (IV) sulfate	18. _____
19. iron (II) chloride	19. _____
20. tin (II) acetate	20. _____

Name: _____

Date: _____

Chemistry: *Ionic Compounds: Polyatomic Ions*

Write the name of each of the following compounds.

1. NH_4Cl 1. _____
2. $Mg(NO_3)_2$ 2. _____
3. $Ca(OH)_2$ 3. _____
4. $BeSO_4$ 4. _____
5. $(NH_4)_3N$ 5. _____
6. NH_4NO_3 6. _____
7. $Sr_3(PO_4)_2$ 7. _____
8. $Zn(NO_3)_2$ 8. _____
9. $AgOH$ 9. _____
10. K_2CO_3 10. _____

Write the chemical formula for each of the given names.

11. sodium carbonate 11. _____
12. barium nitrate 12. _____
13. ammonium sulfate 13. _____
14. aluminum hydroxide 14. _____
15. calcium phosphate 15. _____
16. magnesium acetate 16. _____
17. sodium nitrate 17. _____
18. calcium acetate 18. _____
19. beryllium sulfate 19. _____
20. zinc carbonate 20. _____

Name: _____
Date: _____

Chemistry: *Ionic Binary Compounds: Single-Charge Cations*

Write the name of each of the following compounds.

1. Na_2S 1. _____
2. Al_2O_3 2. _____
3. NaCl 3. _____
4. RbI 4. _____
5. $ZnBr_2$ 5. _____
6. AgCl 6. _____
7. AlN 7. _____
8. BaF_2 8. _____
9. Sr_3N_2 9. _____
10. $MgCl_2$ 10. _____

Write the chemical formula for each of the given names.

11. magnesium nitride 11. _____
12. calcium oxide 12. _____
13. silver fluoride 13. _____
14. beryllium chloride 14. _____
15. potassium iodide 15. _____
16. aluminium chloride 16. _____
17. zinc oxide 17. _____
18. barium bromide 18. _____
19. lithium nitride 19. _____
20. potassium sulfide 20. _____

Name: _____
Date: _____

Chemistry: *Ionic Binary Compounds: Multiple-Charge Cations*

Write the name of each of the following compounds.

1. CuF	1. _____
2. CuF_2	2. _____
3. Cr_2O_3	3. _____
4. PbI_2	4. _____
5. $PbCl_4$	5. _____
6. CrO_3	6. _____
7. $AuBr$	7. _____
8. NiO	8. _____
9. VI_3	9. _____
10. SnO_2	10. _____

Write the chemical formula for each of the given names.

11. manganese (VII) oxide	11. _____
12. niobium (V) chloride	12. _____
13. titanium (III) phosphate	13. _____
14. palladium (IV) sulfide	14. _____
15. platinum (II) fluoride	15. _____
16. osmium (III) oxide	16. _____
17. iridium (IV) nitride	17. _____
18. cobalt (II) chloride	18. _____
19. iron (III) sulfide	19. _____
20. gold (III) iodide	20. _____
