Writing Ionic Formula 2

Write the formula of the following ionic compounds, by writing the ionic charge – before writing the formula. See the examples below.

1. Magnesium chloride

Charges => Mg^{+2} Cl^{-1}

Formula => $MgCl_2$

2. Sodium sulfide

Charges => Na^{+1} S^{-2}

Formula => Na_2S

3. Copper (II) iodide

Charges =>

Formula =>

4. Calcium chloride

Charges =>

Formula =>

5. Zinc fluoride

Charges =>

Formula =>

6. Iron (III) sulfide

Charges =>

Formula =>

7. Barium bromide

Charges =>

Formula =>

8. Aluminium oxide

Charges =>

Formula =>

9. Potassium sulfide

Charges =>

Formula =>

10. Lead (III) chloride

Charges =>

Formula =>

11. Sodium carbonate

Charges =>

Formula =>

12. Copper (II) sulfate

Charges =>

Formula =>

13. Magnesium nitrate

Charges =>

Formula =>

14. Lead (IV) hydroxide

Charges =>

Formula =>

15. Cobalt chloride

Charges => Co^{+2}

Formula =>

16. Sodium sulfate

3. Copper (I) carbonate

Charges =>

Formula =>

4. Calcium nitride

N^{-3}

5. Zinc hydroxide

Charges =>

Formula =>

6. Lead (III) sulfate

7. Ammonium bromide

Charges =>

Formula =>

8. Aluminium nitrate

9. Potassium sulfide

Charges =>

Formula =>

10. Lead (III) chloride

11. Sodium ethanoate

CH_3COO^-

Charges =>

Formula =>

12. Ammonium sulfate

13. Beryllium nitrate

Be^{+2}

Charges =>

Formula =>

14. Lead (IV) nitrate

15. Calcium hydroxide

Charges =>

Formula =>

16. Iron (II) phosphate

PO_4^{-3}
