W.S.49. The rock cycle.

Name .....

Over millions of years rocks slowly change from one type into another. This is called the ROCK CYCLE. The diagram below shows how it happens.

Exercise - Fill in the missing words in the passage below.

Weathering of rocks causes small particles called ..... to form. The sediments are ..... by rivers to seas. Over many years ..... of sediments build up on the sea bed. The sediments are squashed together so that they form ..... rocks. Sandstone and ..... are two examples of sedimentary rocks. Heat and pressure deep inside the Earth may change sedimentary rock into ..... rock. Rocks inside the Earth may melt to form ..... Sometimes magma returns to the surface during volcanic ..... It then cools down to form solid ..... rock.

mudstone magma igneous sediments metamorphic transported eruptions layers sedimentary
