Vocab-busters

Digestions and Respiration

Link each word in the left hand column with the correct explanation on the right.

	Vocab	To
1	Diet	
2	Carbohydrates	
3	Proteins	
4	Fat	
5	Vitamins/Minerals	
6	Fibre	
7	Digestion	
8	Teeth	
9	Enzymes	
10	Saliva	
11	Gullet	
12	Stomach	
13	Pancreas	
14	Absorption	
15	Small Intestine	
16	Glucose	
17	Liver	
18	Respiration	
19	Cells	
20	Oxygen	
21	Carbon dioxide	
22	Water	
23	Large Intestine	
24	Waste	
25	Excretion	
26	Anus	

	Explanation	√
a	The breaking down of food into small molecules.	
b	The organ in which glucose molecules are stored.	
c	Your intake of food and drink.	
d	The gas required during respiration.	
e	This provides an insulation layer, and some energy (found in dairy products).	
f	The burning of glucose to produce energy.	
g	These keep our bodies healthy (in fruit and vegetables).	
h	A leaf shaped organ that produces enzymes.	
i	The hole through which waste is removed.	
j	Used to cut up and grind down food.	
k	Our main source of energy (in pasta, bread, cereals).	
l	Respiration takes place in these.	
m	Contains enzymes and eases the swallowing of food.	
n	Aids the healthy excretion of solid waste (in bread).	
o	The waste gas produced during respiration.	
p	Required for growth and repair processes (in fish, nuts)	
q	The unwanted products of digestion and respiration.	
r	Chemical scissors that break up large food molecules.	
s	The organ in which absorption of water takes place.	
t	Small molecules produced by digesting carbohydrates	
u	This organ mechanically churns and digests food.	
v	The removal of waste materials from the body.	
w	The passing of small food molecules into the blood.	
x	The liquid produced during respiration.	
y	The tube that carries food from mouth to stomach.	
z	The organ in which absorption of food takes place.	

Vocab-busters.
These tasks could be used as pre-topic assessments, checklists to cross off as ideas are taught, or revision tools.
