Name: _____

Forces & Motion

Directions: Write the force words that complete each sentence.

push	pull	gravity	friction	force
inertia	machine	energy	balance	Newton

1. The greater the _____ the easier the object will move.
2. To do the job in less time and with less energy, use a _____
3. That rock will roll down the hill due to the force of _____
4. To make something _____ both ends need to have the same weight.
5. It takes _____ to get a job done.
6. _____ is the idea that something in motion will remain in motion, and something at rest will remain at rest, unless affected by an outside source.
7. It would be more difficult to _____ a wagon if it didn't have wheels.
8. If you have a few people _____ on the rope, the box will be easier to move.
9. _____'s theories on motion are still believed correct today.
10. We added wheels to our bureau to create less _____ when we move it.

Putting it all together

Summing up

Copy and complete the statements below to compile a summary of this unit.
The missing words can be found in the word list below.

1. Forces can start motion, _____ motion, speed up or slow down motion, change the direction of motion, change the _____ of an object or have no visible effect at all.
2. _____ can attract some substances, including iron.
3. Magnets have a _____ pole and a _____ pole.
4. Magnets have a magnetic _____ around them that can be detected with a compass.
5. Magnetic and _____ forces and gravity are forces that can act without objects coming into contact with each other.
6. A coil of wire wrapped around an iron core with an electric current running through the wire is an _____.
7. _____ is an upward push on an object by a fluid.
8. Surface _____ is a force which acts at the surface of a liquid, making the surface behave like a skin.
9. _____ is a rubbing force applied to a surface by another surface.
10. Friction can be reduced by applying _____ between surfaces.
11. An object that is shaped in a way to reduce its fluid friction is said to be _____.
12. _____ is the force that pulls objects towards the centre of the Earth.
13. _____ is measured in kilograms while weight is a force measured in newtons.
14. Air resistance is an example of _____ friction which acts on objects moving through air.

Word list

north	mass	field	stop
electrostatic	magnets	fluid	electromagnet
friction	buoyancy	lubricants	gravity
south	tension	streamlined	shape
