Science Inquiry Tasks

Friction

What you will need: scrap book, three small objects from around classroom and a copy of the *Scientific Method worksheet*.

Method:

1. Put the three objects you have chosen on the long edge of the scrapbook.
2. Predict which object you think will slide first and which object will slide last when you lift the scrapbook to create a slope. Explain your prediction.
3. Evenly lift the edge of the book that has the three objects on it.
4. Record the objects in order as they slide down your scrapbook slope.
5. The object with the least friction will slide first.

Floating

What you will need: 1 x big ball of blue tac, 1 x flattened strip of blue tac, tub of water and a copy of the *Scientific Method worksheet.*

Method:

1. Predict what you think will happen when you put the ball of blue tac into the water. Will it float or sink? Why?
2. Predict what you think will happen when you put the flattened strips of blue tac into the water. Will they float or sink? Why?
3. Put both pieces of blue tac into the water and observe what happens.
4. Complete the *Scientific Method worksheet.*
