

Forces

PowerPoint Collection

Lots of Forces

How many other forces can you name?

Friction. Air resistance. Drag.

Consider the car again …

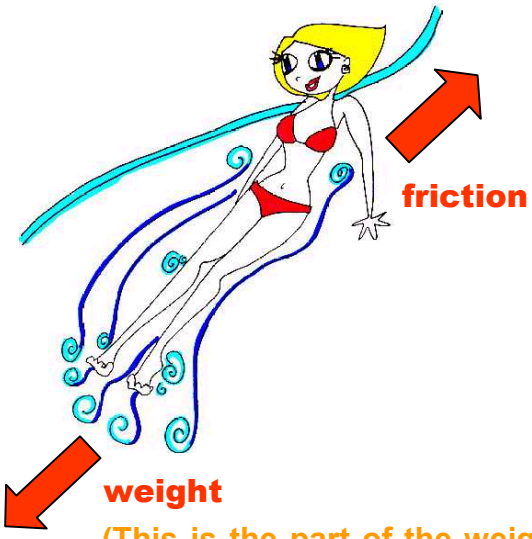

Are the forces balanced?

No, the thrust is bigger.

What will happen to the car's speed?

It will speed up.

(This is the part of the weight acting down the slide).

Consider a girl on a waterslide …

Are the forces balanced?

Yes.

What will happen to her speed?

It will stay the same.

Consider a boy on a skateboard …

Are the forces balanced?

No. There will be a friction force acting backwards.

What will happen to his speed?

He will slow down
