WHAT DOES A SCIENTIST DO?

Testing the "All we can do is sit and wait" theory.

Branches of Science

Situation	What area of science is this?
Jim wants to know how far away the Sun is from The Earth	
Kelly wants to know how dolphins can survive in cold water.	
Jenny wants to know what oil spilt into a local lake will do to the living things in the lake's environment.	
Mandy wants to know how much energy a solar generator will produce.	
Sandy helped Kate deal with her depression.	
Elisabeth researched the rocks in outback Australia to see if any of them contained lithium metal.	
Kate wanted to know the chemical reaction that would occur if the two materials sodium metal and Chlorine gas were heated together.
