Interphase

1. Growth, metabolism

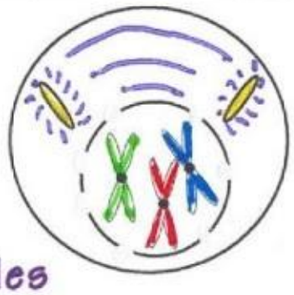

2. Chromosomes copied

Prophase

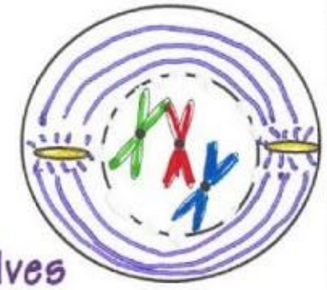

3. Chromosomes appear

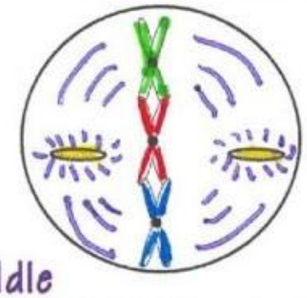

4. Centrioles to poles

Nuclear

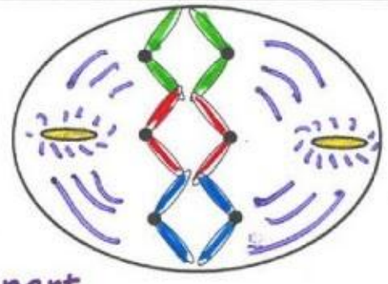

5. Membrane dissolves

Metaphase

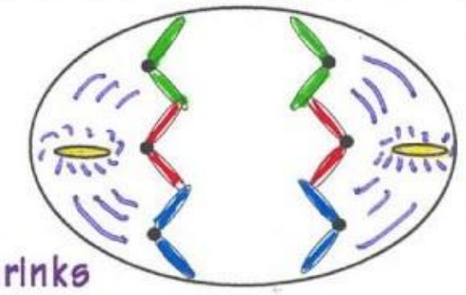

6. Chromatids to middle

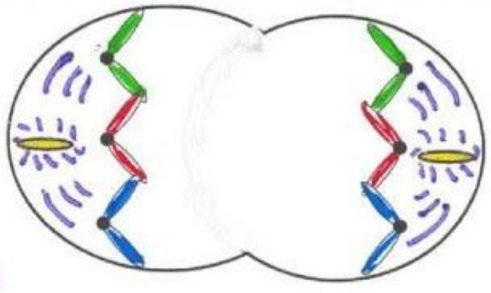

Anaphase

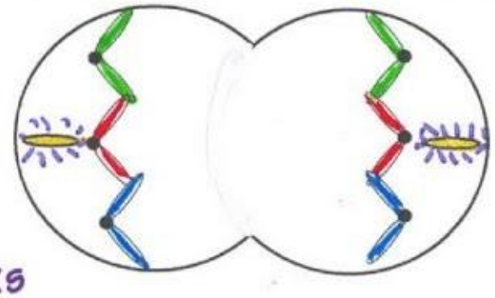

7. Chromatids apart

8. Spindle shrinks

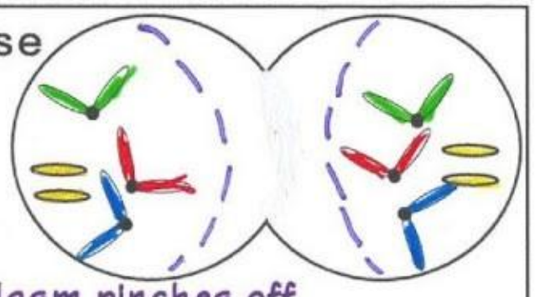

9. Shrinks

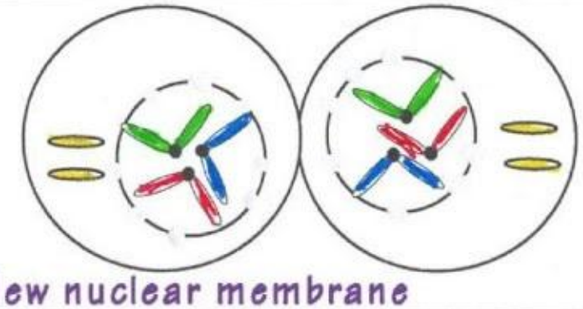

10. Shrinks

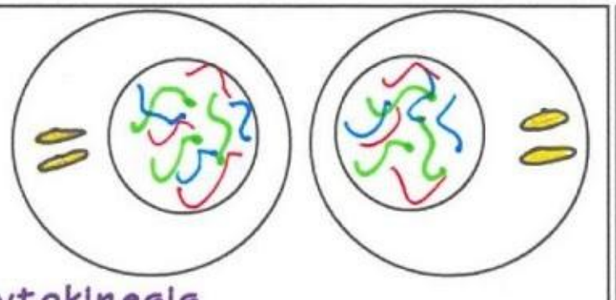

Telophase

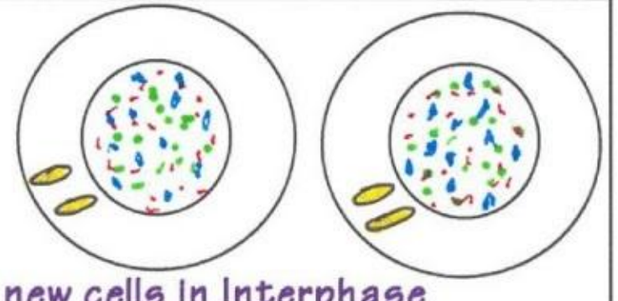

11. Cytoplasm pinches off

12. New nuclear membrane

13. Cytokinesis

14. 2 new cells in Interphase
