CELL ORGANELLE BINGO

Bingo instructions: read out the functions of the organelle and students cross it out on their sheets. To win, students must get 3 in a row. (please list winners for Vivo points)

Directs cell activities and contains genetic material called chromosomes made of DNA. (Nucleus)

Make energy in the form of ATP (Mitochondria)

Make proteins using amino acids (Ribosomes)

Process and package proteins (Golgi Apparatus)

Digestion and recycling using enzymes (lysosomes)

‘Highway’ for transporting items around the cell (endoplasmic reticulum)

Controls the movement of substances in and out of the cell (cell membrane)

Forms the spindle fibres for cell division (centrioles)

Jelly-like substance that contains all organelles (cytoplasm)
