Name _____ Cells and Body Organisation

1. What does unicellular mean: _____
2. What does multicellular mean? _____
3. What order should these words go in to show the body organisation?

Cells, Tissues, Organelles, Organ systems, Organism, Organ

_____→_____→_____→_____→

_____→_____

4. Organelles are _____ structures performing _____ jobs
5. The mitochondria provides _____ to the cell
6. The ribosomes are involved in _____ _____
7. List 3 types of specialised cells

   _____

8. Name one type of tissue in humans

   _____

9. Name 3 organs in humans

   _____

10. Are these ‘levels of organisation’ found in:

    a) Multicellular organisms

    b) Unicellular organisms

    c) both

Name _____ Cells and Body Organisation

11. What does unicellular mean: _____

12. What does multicellular mean? _____

13. What order should these words go in to show the body organisation?

Cells, Tissues, Organelles, Organ systems, Organism, Organ

_____→_____→_____→_____→_____→_____→_____

14. Organelles are _____ structures performing _____ jobs

15. The mitochondria provides _____ to the cell

16. The ribosomes are involved in _____ _____

17. List 3 types of specialised cells

_____

18. Name one type of tissue in humans

_____

19. Name 3 organs in humans

_____

20. Are these 'levels of organisation' found in:

d) Multicellular organisms

e) Unicellular organisms

f) both

Photosynthesis and respiration

1. Which **element** is the main part of all living things?

   _____

2. Where does photosynthesis happen? _____

3. What does ‘photo’ mean? _____

4. What does ‘synthesis’ mean? _____

5. Animals get carbon by _____

6. Photosynthesis happens in:

   a) Plants
   b) Animals
   c) Both

7. Respiration happens in:

   d) Plants
   e) Animals
   f) Both

8. Write the word equation for photosynthesis:

   _____ + _____+ _____ →_____ +

   _____

9. Write the word equation for respiration:

   _____ + _____→ _____ + _____ +

   _____

10. What is the molecule with the green pigment (colour) in plants called? _____

11. Where does respiration happen in cells? _____

12. How do the cells get the oxygen needed for respiration?

_____

Photosynthesis and respiration

13. Which **element** is the main part of all living things?

_____

14. Where does photosynthesis happen? _____

15. What does ‘photo’ mean? _____

16. What does ‘synthesis’ mean? _____

17. Animals get carbon by

_____

18. Photosynthesis happens in:

g) Plants
h) Animals
i) Both

19. Respiration happens in:

j) Plants
k) Animals
l) Both

20. Write the word equation for photosynthesis:

_____ + _____+ _____ →_____ +

_____

21. Write the word equation for respiration:

_____ + _____→ _____ + _____ +

_____

22. What is the molecule with the green pigment (colour) in plants called? _____

23. Where does respiration happen in cells? _____

24. How do the cells get the oxygen needed for respiration?

_____
