Label the cell below

| Organelle | Represented by | What it's role/function is in a real cell |
|---|---|---|
| Nucleus | The 'skin' that holds the cell together | |
| Ribosomes | A watery, jelly-like mixture that contains many smaller parts where the work of the cell takes place | |
| Rough ER | The powerhouse of the cell where the energy we need is released from the food we eat | |
| Smooth ER | The skeleton of a plant | |
| Lysosomes | The garbage disposal units that get rid of wastes from the cell | |
| Golgi Bodies | Part of the cell where photosynthesis takes place | |
| Mitochondria | Control centre of the cell | |
| | Contains wastes or chemicals that are being moved around the cell | |
| | Microscopic factories that produce the proteins we use to grow and repair our bodies | |
| | Pathways that allow materials to move quickly and easily through the cell | |
