Year 8 Science
Phase Changes

Match these words with the correct statement.

Freezing	Condensation	Cooling
Melting	Phase	Atoms
Evaporation	Gas	Liquid
Heating	Solid	

1. Gas changes to liquid. _____
2. Liquid changes to gas. _____
3. Solid changes to liquid. _____
4. Liquid changes to solid. _____
5. Speeds particles up. _____
6. Slows particles down. _____
7. Very little particle motion in this type of substance. _____
8. In this type of substance the particles move more freely. _____
9. Particles that make up matter are called this. _____
10. Particles move freely in this type of substance. _____
11. Another word for state of matter. _____

What is matter made of?

All matter is made up of very tine particles called atoms. These are so small that even if they are made to appear 100 000 times larger, you still cannot see them.
