Name: _____

Year 8 Biology - Respiration Vocabulary Mini Quiz

3.2 Pearson Science

Write the number relating to the correct definition in each box

☐	Respiration	1. The flap that can block the trachea or oesophagus
☐	Mucus	2. Space at the back of the throat
☐	Pharynx	3. A very small blood vessel
☐	Trachea	4. O_2
☐	Bronchi	5. CO_2
☐	Bronchiole	6. Breathing out
☐	Alveoli	7. Breathing in
☐	Diaphragm	8. A firm but flexible tissue, found in C shaped rings around trachea
☐	Cartilage	9. More than one Alveoli
☐	Gas Exchange	10. Slimy substance produced by membranes
☐	Breathing	11. Responsible for our voice, the voice box
☐	Inhalation	12. Air sac where gas exchange occurs
☐	Exhalation	13. Correct term for windpipe
☐	Carbon Dioxide	14. One leads into each lung
☐	Oxygen Gas	15. Branches that take air to the alveolus
☐	Capillary	16. Separates the thorax from the abdominal cavity and helps with breathing
☐	Alveolus	17. Ventilating the lungs, moving air in and out
☐		

Larynx

Epiglottis

Name: _____

Year 8 Biology - Respiration Vocabulary Mini Quiz

3.2 Pearson Science

Write the correct term on the line next to each definition

_____ 1. The flap of skin that can block the trachea or oesophagus

_____ 2. Space at the back of the throat

_____ 3. A very small blood vessel

_____ 4. O_2

_____ 5. CO_2

_____ 6. Breathing out

_____ 7. Breathing in

_____ 8. A firm but flexible tissue

_____ 9. More than one Alveoli

_____ 10. Slimy substance produced by membranes

_____ 11. Responsible for our voice, the voice box

_____ 12. Air sac at the end of the bronchiole

_____ 13. Windpipe

_____ 14. One leads into each lung

_____ 15. Branches that take air to the alveolus

_____ 16. Separates the thorax from the abdominal cavity and helps with breathing

18. The process by which gases in the blood are exchanged for gases in the alveolus

19. Chemical reactions in the body that release energy

_____ 17. Ventilating the lungs, moving air in and out of the body

_____ 18. The process by which gases in the blood are exchanged for gases in the alveolus

_____ 19. Chemical reactions in the body that release energy
