What forces can do (using Play doh)

1. Make two balls.

2. Roll them into each other – watch them change direction.

3. Push one across the table – it speeds up (accelerates)

4. Roll one then slow it down with your hand – it slows down (decelerates)

5. Roll one then stop it with your hand – it stops.

6. Squish the balls down with your hand – it changes shape.

Look at a spring balance

Measure how many newtons three objects have.
