Energy Changes (p179-181)

Sometimes energy can be passed from one object to another. At other times, energy changes into other forms of energy.

Energy Transfer

1. What is energy transfer?

2. Give an example of energy transfer.

Energy Transformation

1. What is energy transformation?

2. Give an example of an energy transformation.

3. Describe an energy flow diagram.

4. Write energy flow diagrams for
    a. A toaster

    b. An iPod

    c. A wind-up toy

5. Describe the energy changes involved when a glass falls off a table.

6. Draw an energy flow diagram to show the energy changes you described in 5.

Conservation of Energy

1. What is the law of conservation of energy?

2. What might happen to the energy?

3. What happens to wasted energy?

4. Give an example of conservation of energy when you kick a ball.
