Chapter 2 Cells

Name:_____Class:_____Date: _____

EXTRA WORKSHEET 2 Cells and microscopes

SCIENCE AS A HUMAN ENDEAVOUR **VISUAL/SPATIAL**

Refer to Science as a Human Endeavour on pages 51 and 52 of your student book to answer the following questions.

1 **State** the year in which cells were first discovered.

_____

2 **State** the name of the scientists who first discovered cells.

_____

3 **Explain** why cells had not been seen earlier.

_____

_____

4 **State** the year in which living cells were observed for the first time.

_____

5 **State** the name of the scientist who made the observation.

_____

6 **Describe** what this scientist had done that enabled him to observe living cells.

_____

_____

7 In 1833 Robert Brown observed nuclei in cells. **Propose** why it took so long (another 70 years) before other cell organelles were observed.

_____
_____

8 **Summarise** the proposals made by Mattias Schleiden.

_____
_____
_____
_____

9 **Describe** the importance of what Schwann added to Schleiden's proposals.

_____
_____
_____

10 **State** the main ideas of the cell theory.

_____
_____
_____
_____
_____

11 **Name** the invention that enabled objects smaller than nuclei and chloroplasts to be seen.

_____

12 **State** the maximum magnification that is achieved by modern microscopes.
