Microscopes

Use page 152 of Jacaranda Science 1 to help you compete the following activities.

Using Microscopes

Microscopes can be easily damaged and are very expensive. To stop accidents happening, we need to know how to handle and use them correctly.

Using your book, list the six important rules to remember when using microscopes.

1.

2.

3.

4.

5.

6.

Parts of a Microscope and their Functions

Use your book to label the microscope below.

What are the steps for the correct use of a microscope?

1.

2.

3.

4.

5.

6.

7.

8.

9.

Match the microscope part to its function.

Eyepiece Lens	The platform on which the microscope is built.
Focus knob	The lens you look through to see the object you are studying.
Stage	Positioned beneath the stage to direct light through the object you are studying.
Mirror	The adjustable tube between the eyepiece and the objective lens.
Base	Rotates to change the objective lenses.
Stage Clip	The platform on which the object you are studying is placed.
Microscope Tube	A knob that can be turned to bring the object you are studying into focus.
Objective Lens	The lens closest to the object you are studying. There may be more than one of these lenses.
Revolving Nosepiece	Holds the slide in place on the stage.
