Investigating planning sheet

I want to find out
These are pictures of what I will use
This is what I saw (diagram/caption)

Investigating planning sheet

I want to find out
I will use (labelled diagram)
What I think will happen
What I will keep the same
What I will change
What I found out (results)

Bar chart

Investigating planning sheet

Question – *what do you want to find out?*
What equipment do you need?

Prediction – *what do you think will happen?*
How will you make it a fair test? *What factor will you keep the same?*
What factor are you going to change?
What are you going to observe (look at)?
Results table

Conclusion *What did you find out?* *Were your predictions correct?*
Bar chart

Investigating planning sheet

Question *I want to find out……*
Equipment I will use
My prediction (I think) is……
The factor I will change is…….

The factor I will measure is……
The factor I will observe is……
I will make it a fair test by…… *What are you keeping the same?*
Results table *How will you make the results reliable?*
Conclusion *What did you find out?*

Were your predictions correct? *Why do you think this happened?*
Line graph/Bar chart

Investigating planning sheet

Question – *what do you want to find out?*
Equipment *I will use……..*
Prediction *I think……..*
Factor to change
Factor to measure
Fair test – *What will I keep the same?*
Factor to observe

Results table – *How will I make my results reliable?*

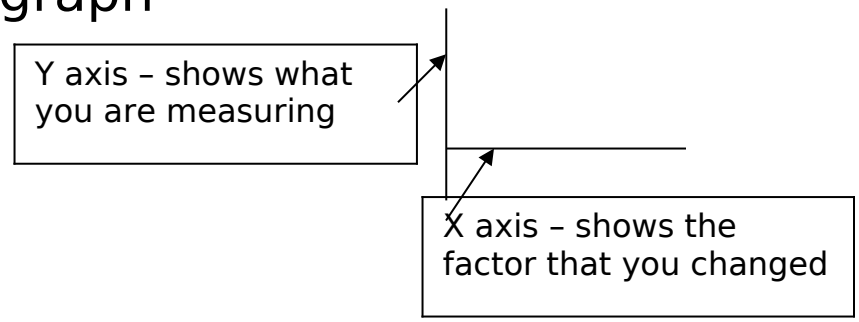

Conclusion

What did I find out?

How does this relate to my prediction?

Why did this happen?

Line graph

Investigating planning sheet

Question
Equipment
Prediction
Factor to change
Factor to measure
Fair test – *Factor to keep the same*
Factor to observe
Results table – *reliable*

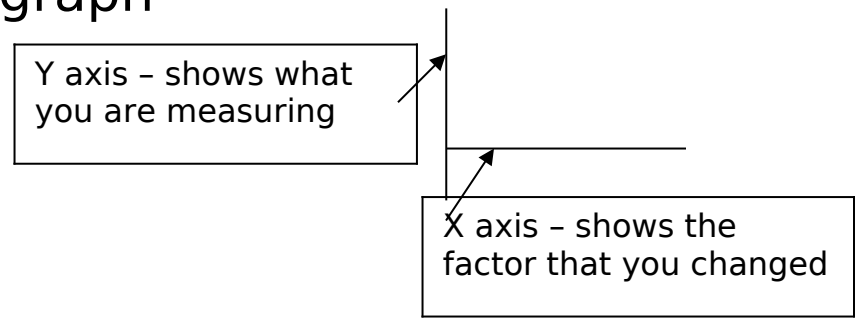

Conclusion

What did you find out?

Relate to your prediction

Why did this happen? (Scientific theory)

Line graph

Y axis – shows what you are measuring
X axis – shows the factor that you changed
