Force Multiplier	**Distance/speed multiplier**	**No advantage**
• 1st and 2nd class levers • Inclined plane • Wedges • Screws • Moveable pulleys • Wheel and axle – when effort is applied to rim of the wheel • Gears – when the driving gear is smaller than the driven gear	• 3rd class levers • Wheel and axle – when effort is applied to axle of the wheel • Gears – when the driving gear is larger than the driven gear	• Fixed pulleys

- 1st and 2nd class levers
- 3rd class levers
- Inclined plane
- Wedges
- Screws
- Moveable pulleys
- Fixed pulleys
- Gears – when the driving gear is smaller than the driven gear
- Gears – when the driving gear is larger than the driven gear
- Wheel and axle – when effort is applied to axle of the wheel
- Wheel and axle – when effort is applied to rim of the wheel

Force Multipliers	Speed/ Distance Multipliers	No Advantage
