# Moon Phases

Use the pictures below to record your observations of the Moon phases. Start your observations and phase calendar at a New Moon. Write the date into the small white square (for example, 28 for the 28th of the month). Use a black marker or crayon to shade in the portion of the Moon that matches the Moon phase you observe. For more information about this activity and how to use this calendar, visit us online at: **http://www.escapadedirect.com/moonphases.html** .
