Food webs

A **food web** shows the links between all the organisms that live in a particular **habitat**. A food web can include lots of different individual food chains.

☞ **1** Draw links between the organisms in the picture to show who eats what.

2 In your workbook, draw your own food web using the following savannah animals and plants.

zebra	wildebeest	giraffe	gazelle	lion	cheetah
vulture	dung beetle	snake	hyena	jackal	meerkat
warthog	mouse	baboon	fly	centipede	grass
shrubs	trees	hare
