Strange hybrids

☞ **1** Circle the correctly spelled word in each pair.

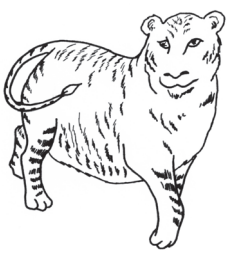

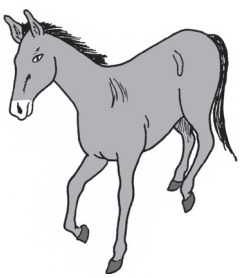

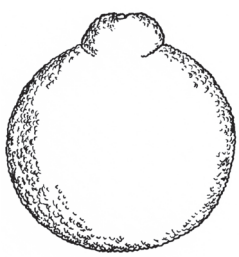

The word **hybrid** refers to the offspring/ofspring from a cross between two **genetically** different plants or animals. Most people use the word hybrid to lable/label the offspring of a domestic animal crossed with a wild animal, or a cross between spieces/species. For example, a wild duck crosed/crossed with a domestic duck, or the mule, which/witch is the offspring of a female horse and a male donkey. More **exotic** examples include the liger, which is the offspring of a lion and a tiger, and a zeedonk, produced by a zebra and a donkey. Many hybrids/hybreds are **sterile** and cannot reproduce. Plant hybrids are far more common/comon and often produce **viable** seed. Many corn varietes/varieties are hybrids. Other examples are loganberries, peppermint, tangelo/tanjello and grapefruit.

2 Use the word bank to fill in the table below.

Word bank

tiger liger tangerine donkey raspberry zeedonk

donkey horse mule blackberry tangelo

				
lion and t_____ cross	h_____ and d_____ cross	zebra and d_____ cross	b_____ and r_____ cross	pomelo and t_____ cross
l_____	m_____	z_____	loganberry	t_____
