Materials around us

☞ **1** Fill in the missing vowels (a, e, i, o, u) to complete the following passage.

M__t__r__ __ls are the th__ngs that objects are m__d__ from. M__t__r__ __ls can be m__n-m__d__ or n__t__r__l. Natural materials or r__s__ __rc__s are anything that comes from n__t__r__ that people can use, such as w__t__r, w __ __d, pl__nts, o __l and c__ __l. Natural materials are also called r__w materials.

Pr__c__ss__d materials are man-made using one or more n__t__r__l materials. For example, pl__st__cs are made from crude o __l. Gl__ss is a man-made material made from s__ nd, l__m__ and other minerals. A number of different raw materials, including c__rb__n, __r __n, chromium and nickel, are added together to make st__ __ nl__ss st__ __ l.

2 Decide which of the materials listed below are natural and which are processed (man-made). Write them under the correct headings.

tree	sand	plastic	paint	corn	steel
water	wheat	flour	glass	gold	cement

Natural materials	Processed materials (man-made)

3 Match the phrases below.

Concrete is made from	iron, chromium, carbon and nickel.
Plastic is made from	blue metal, sand, cement and water.
Stainless steel is made from	sand, lime and other minerals.
Glass is made from	crude oil.
