Task 1

Describe the conditions that animals have to cope with in a desert environment.

Task 2

Cut out the adaptations that a camel has and match them to the correct statement to show how each adaptation helps the camel to survive in the desert.

Adaptation	How the adaptation helps the camel
Nostrils that can close.	So that they can eat prickly plants.
Two rows of long eyelashes.	Helps them to blend into the surroundings.
Large, flat, padded feet.	Stops sand getting in its eyes.
Thick hair on their back.	Reduces heat energy loss during cold nights.
Thick eyebrows.	Stops sand going up its nose.
Hump made of fatty tissue.	Prevents their feet sinking into the sand.
Less hair elsewhere on body.	Shade their eyes from the sun.
Thick leathery lips.	An energy store.
A sandy coloured coat.	Allows heat energy loss during the day.

Teaching notes - Answers

Task 1

Sandy, hot, dry, high temperatures during day, low temperatures at night, exposed.

Task 2

Adaptation	Reason for adaptation
Nostrils that can close.	Stops sand going up its nose.
Two rows of long eyelashes.	Stops sand getting in its eyes.
Large, flat, padded feet.	Prevent their feet sinking into the sand.
Thick hair on their back.	Reduces heat energy loss during cold nights.
Thick eyebrows.	Shade their eyes from the sun.
Hump made of fatty tissue.	An energy store.
Less hair elsewhere on body.	Allows heat energy loss during the day.
Thick leathery lips.	So that they can eat prickly plants.
A sandy coloured coat.	Helps them to blend into the surroundings.
