Cataracts	**Start:** What are the conditions inside your body known as?	Your internal environment	Your body carefully controls its internal environment. What is this balancing act called?
Homeostasis	What do enzymes need to work at their best?	Optimum conditions	What structures detect changes in your internal and external environment?
Receptors	What are these changes called?	Stimuli	Which two organs coordinate communication within your body?
The brain and pancreas	Muscles and glands respond to stimuli. What are these known as?	Effectors	How are signals passed around the nervous system?
By electrical impulses	How fast can electrical impulses travel?	Up to 120 m/s	Which specialised cells carry electrical impulses?
Neurones	What is the CNS?	Central nervous system	Which cells carry impulses from your eyes, ears, tongue and skin?
Sensory neurones	Your brain sends impulses out to muscles along special cells. What are these called?	Motor neurones	How do your muscles respond to an impulse?
Muscles contract	How do glands respond when they receive an impulse?	Glands secrete chemicals known as hormones	Whilst reading this I will blink. What is this an example of?

© www.teachitscience.co.uk 2019

A reflex action	Which special neurones connect sensory and motor neurones in the CNS?	Relay neurones	What is the pathway involving the relay neurone called?
The reflex arc	What is the gap between two neurones called?	A synapse	What substances transmit the impulse across the synapse?
Neurotransmitters	How does the neurotransmitter travel across the synapse?	By diffusion	The end of a motor neurone in a muscle has a special name. What is it?
Motor end plate	You jump when someone shouts 'Boo!' What's this called?	A response	Which part of your brain is especially active during this lesson?
Cerebral cortex	Which part of your brain regulates your body temperature?	Hypothalamus	What type of scan reveals brain activity?
MRI	In your eye, what is the transparent area of the sclera called?	The cornea	What controls pupils?
Your teacher!	What structure do suspensory ligaments work with to hold the lens in place?	Ciliary muscles	What condition do short-sighted people have?
Myopia	Distant objects are in focus but print on the page is blurred. What condition is this?	Hyperopia	Cloudy patches in the eye's lens are known as...?

Teaching notes

There are 32 cards, allowing it to be used with a whole class. The activity could also be done individually, in pairs or in small groups to produce a complete ordered set of cards.
