Task

Complete the columns, stating in each case whether a new substance is produced and whether the change is physical or chemical.

When you have completed this, think of two more chemical changes and two more physical changes and add them to the table.

Change	Is a new substance produced ...? (Y/N)	Is the change physical or chemical ...?
... when oxygen is mixed with a substance		
... when a boiling kettle releases water vapour		
... when you heat a substance and there is a colour change and a gas is given off		
... when something combines with oxygen and gives out a lot of heat energy		
... when a poker glows red hot in a fire		
... when ice cubes melt in a glass of water		
... when copper sulphate is heated and it changes from blue to white		
... when flour, milk and eggs are used to make a pancake		
... when iron oxide is heated with carbon to make iron		
... when sugar ferments to make alcohol		
... when salt is added to water to make salt solution		
... when wine turns sour after the bottle has been opened		
... when an iodine block is heated to give off a vapour		
... when a bonfire burns		
... when glow sticks give out light		
... when a battery powers a torch		

Answers

Change	Is a new substance produced ...? (Y/N)	Is the change physical or chemical ...?
... when oxygen is mixed with a substance	N	physical
... when a boiling kettle releases water vapour	N	physical
... when you heat a substance and there is colour change and a gas is given off	Y	chemical
... when something combines with oxygen and gives out a lot of heat energy	Y	chemical
... when a poker glows red hot in a fire	N	physical
... when ice cubes melt in a glass of water	N	physical
... when copper sulphate is heated and it changes from blue to white	Y	chemical
... when flour, milk and eggs are used to make a pancake	Y	chemical
... when iron oxide is heated with carbon to make iron	Y	chemical
... when sugar ferments to make alcohol	Y	chemical
... when salt is added to water to make salt solution	N	physical
... when wine turns sour after the bottle has been opened	Y	chemical
... when an iodine block is heated to give off a vapour	N	physical
... when a bonfire burns	Y	chemical
... when glow sticks give out light	Y	chemical
...when a battery powers a torch	Y	chemical
