Task 1

Use the periodic table to complete the table below to show the symbols for the following elements.

Hydrogen	.....	Chlorine	.....	Neon	.....
Carbon	.....	Nitrogen	.....	Nickel	.....
Fluorine	.....	Magnesium	.....	Manganese	.....
Potassium	.....	Calcium	.....	Cobalt	.....
Lithium	.....	Sulphur	.....	Aluminium	.....
Silicon	.....	Helium	.....	Bromine	.....
Beryllium	.....	Oxygen	.....	Copper	.....
Sodium	.....	Boron	.....	Iodine	.....

Task 2

Which elements are represented by the following symbols?

Kr	Zn	As	P .....
Sn	Rn	Pb	Ar .....

Task 3

The symbols for gold, silver, copper and iron are Au, Ag, Cu and Fe respectively. These elements were some of the first that mankind discovered and used.

a) Why do you think they have symbols that are not the first two letters of their names? Find out what their original names were.
b) Underline all the other elements on the sheet whose symbols are different to their initial letter.

.....

Answers

Task 1

Hydrogen	**H**	Chlorine	**Cl**	Neon	**Ne**
Carbon	**C**	Nitrogen	**N**	Nickel	**Ni**
Fluorine	**F**	Magnesium	**Mg**	Manganese	**Mn**
Potassium	**K**	Calcium	**Ca**	Cobalt	**Co**
Lithium	**Li**	Sulfur	**S**	Aluminium	**Al**
Silicon	**Si**	Helium	**He**	Bromine	**Br**
Beryllium	**Be**	Oxygen	**O**	Copper	**Cu**
Sodium	**Na**	Boron	**B**	Iodine	**I**

Task 2

Kr **Krypton**	Zn **Zinc**	As **Arsenic**	P **Phosphorus**
Sn **Tin**	Rn **Radon**	Pb **Lead**	Ar **Argon**

Task 3

These elements were originally known by their latin names:

Au Aurum = Gold

Ag Argentum = Silver

Cu Cuprum = Copper

Fe Ferrum = Iron
