Teaching notes

Give each group/pair a set of classification cards – there are keyword cards (below) and picture cards (in the PDF). The picture cards are best printed in colour. They could be laminated for reuse. The activity could be differentiated by removing some of the cards.

Suggested use:

1. Ask the students to find the five kingdom cards and put to one side.
2. Ask the students to match the remaining keyword cards with the correct picture.
3. Ask them to group them into the five kingdoms.
4. Then ask them to sort the animal kingdom cards into vertebrates and invertebrates.

Answers

Numbers in brackets refer to the picture number.

Protoctists	amoeba (1),	paramecium (18)				
Prokaryotes	bacteria (2)	blue-green algae(21)				
Fungi	moulds (20)	mushrooms (3)	yeast (4)			
Plants	ferns (9)	mosses (6)	conifers (14)	flowering plants (7)		
Animals	**invertebrates**	arthropods (17)	jellyfish (8)	worms (19)	molluscs (12)	echinoderms (15)
	vertebrates	amphibians (10)	birds (5)	fish (16)	mammals (13)	reptiles (11)
