SCIENCE 1.4 **Name:**_____

WORKSHEET FOUR **WRITING AND NAMING FORMULAE**

TABLE OF IONS

1^+	2^+	3^+	1^-	2^-
H^+	Mg^{2+}	Al^{3+}	Cl^-	O^{2-}
Na^+	Ca^{2+}	Fe^{3+}	OH^-	CO_3^{2-}
K^+	Fe^{2+}		NO_3^-	SO_4^{2-}
	Cu^{2+}		HCO_3^-	
	Zn^{2+}			
	Pb^{2+}			

1. Complete the following chart by writing the formula formed by pairing up the positive ion down the side with the negative ion across the top. The first one has been done for you.(M,E)

	O^{2-}	Cl^-	NO_3^-	SO_4^{2-}
Na^+	Na_2O			
	Sodium oxide			
Zn^{2+}				
Fe^{3+}				
Mg^{2+}				
K^+				

2. Complete the following chart by writing the formula formed by pairing up the positive ion down the side with the negative ion across the top. The shaded compounds are not stable. (M,E)

	Cl^-	**OH^-**	**HCO_3^-**	**CO_3^{2-}**
H^+	**HCl**			
	hydrogen chloride			
Ca^{2+}				
Pb^{2+}				
Al^{3+}				
Fe^{2+}				

3. Write the formulae for the following compounds. (M,E)

(a) iron(III)hydroxide _____(b) magnesium carbonate _____

(c) potassium bicarbonate_____(d) zinc hydroxide_____

(e) hydrogen sulfate_____(f) lead nitrate_____

(g) aluminium oxide_____(h) iron(II)sulphate_____

(i) hydrogen nitrate_____(j) zinc carbonate_____

(k) carbon dioxide_____(l) hydrochloric acid_____

(m) sodium bicarbonate_____(n) hydrogen oxide_____

(o) sodium hydroxide_____(p) calcium sulphate_____
