

Heat Activities

Activity 1

1. Set up 4 beakers containing equal amounts of water. Beaker 1 should contain icy water, beaker 2 hot water (but not too hot!) and beakers 3 and 4 should contain water at room temperature.
2. Place your left hand into beaker 1 and your right hand into beaker 2. Leave your hands in the beakers for 1 minute then place your left hand into the beaker 3 and your right hand into beaker 4.
3. Record your observations in the space below.

Activity 2

1. Collect the samples of materials provided (wood, metal, glass, plastic, Styrofoam).
2. Place your palms flat on the various surfaces and compare how cold they feel.
3. Arrange the materials in order from cold to warm and list them below:

4. Place the thermometer on each material and record the temperature in the space below.

5. What do you notice? Try to explain these results.

Activity 3

1. Fill a beaker with hot water and another with the same amount of cold water.
2. When the water is still, put a drop of food colouring into the centre of each beaker.
3. Record your observations in the space below:
