Speed

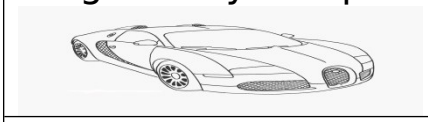

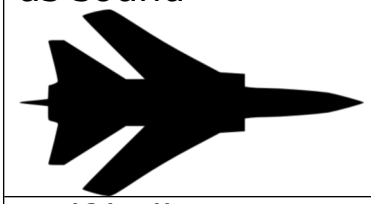

Speed is a measure of how fast an object is moving.

Speed shows how far something can travel in a set amount of time.

A car on the freeway will move 100km every hour so its speed is 100 kilometres per hour(Km/h)

Two common units of measure for speed are meters per second (m/s) and kilometres per hour(km/h)

Examples

Object	Speed
Cheetah running 	110km/h
Bugatti Veyron sports car 	400km/h
Average speed of a bullet from a gun	1700km/h
Jet aeroplane travelling as fast as sound 	343m/s
Golf ball 	60 m/s

Speed is a measure of how _____ an object is moving.

Speed shows how _____ something can travel in a set amount of _____.
