Worksheet 2.2

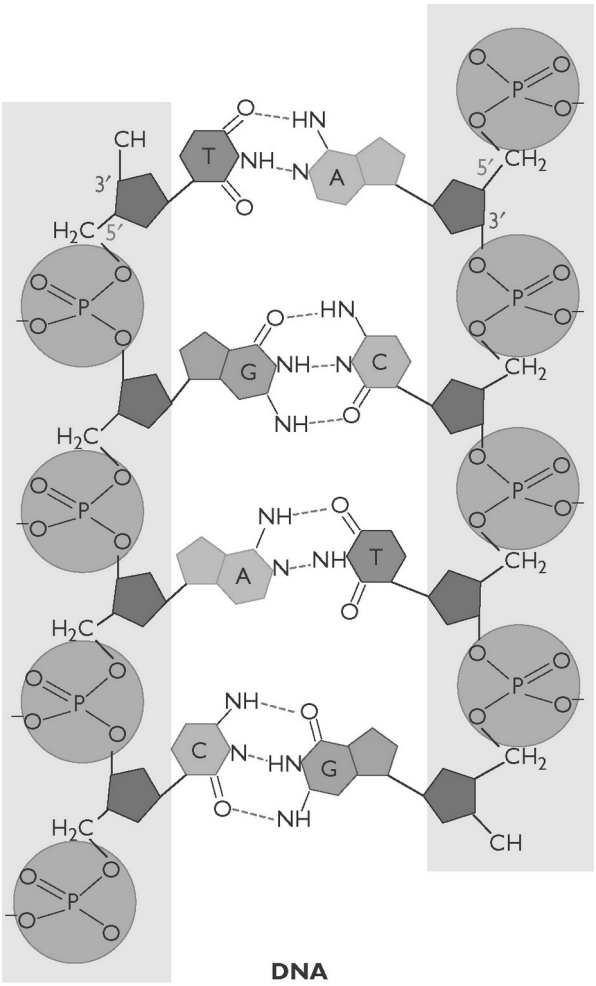

Science Quest 10: pages 56–61

DNA

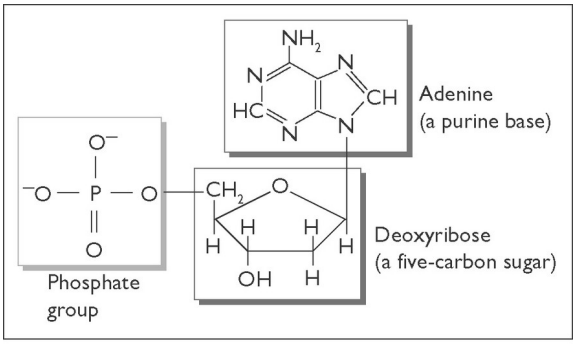

Student: ..... Class: .....

Nucleotides and DNA

1. The following structures show a section of DNA and the composition of nucleotides.

DNA

Nucleotide

(a) Describe the structure of DNA in terms of nucleotides.

.....

.....

.....

.....

(b) Identify the molecules in the nucleotides that form the 'backbone' of the DNA 'ladder'.

.....

.....

.....

.....

(c) State the pairing arrangement of the four types of nitrogen bases.

.....

.....

Two stranded DNA

2. The following diagram is a simplified section of the double-stranded DNA molecule.

(a) Identify components X and Y.

X: .....

Y: .....

(b) In strand 2 on the diagram, record the **letters** of the matching nitrogenous bases.

.....

.....

(c) What shape is a DNA molecule?

.....

.....
