Year Nine Electricity Challenge

Your task is to create a shoebox model and to incorporate two or three light globes.

You will have access to various materials including, but not limited to,

- Paint
- Cellophane
- Felt
- Cardboard
- Coloured card (plain and corrugated)
- Coloured paper (plain and crepe)
- Material
- Popsticks
- Toothpicks

Each group will be given a battery, up to 1m of electrical wire and two or three globes in holders. You may wish to include switches to turn your lights on and off. These can be made using split pins and paperclips.

You have four lessons, including this one to create and wire your model. They will be judged on the last Tuesday of term. There will be two prizes: student choice and teacher choice. The student choice prize will be awarded by Mr Mc Greggor's year one class on the Tuesday morning.

Before you start, you will need to draw a plan of your design and label what each element will be made from.
