VOLCANOES

Complete the following activities neatly using full sentence answers.

1) Using a dictionary define volcano.

2) Is this event natural or artificial?

3) Describe what causes a volcano. You may use Science Quest 9, page 293 to assist you with your answer.

4) What effect does a volcano have on the living and non-living environment?

5) Define disaster using a dictionary. Is a volcanic eruption only a disaster if it effects people in a significant way? This is your own opinion.

6) Are there any good effects of a volcanic eruption?

7) Now read the extract below and re-visit Question 6.

Friends or Foes

Millions of people all around the world live with volcanoes and most of these people benefit from having these restless neighbours. In Hawaii, hundreds of people visit the steaming volcanoes every day. In tropical areas such as Indonesia, the hardened volcanic rock quickly weathers into a rich soil. Rice plantations on volcanic soil can often yield two or three crops of rice a year. Building and road-making materials are often made from volcanic rock.
