Electricity Revision

1. Name the three basic parts of an atom state their charge.

2. Explain the ways in which objects can become charged? What is happening to the atoms of the object?

3. What is the difference between voltage and current?

4. What are each measured in?

5. What does an ammeter do?

6. Electrical energy can be converted into many other forms of energy. Give some examples?

7. Electrical energy can come from a variety of sources. Think of as many as you can.

8. What is a conductor? Give two examples

9. What is an insulator? Give two examples

10. What are the differences between a parallel and series circuits? Draw a diagram to illustrate your answer.
